

In Bulkhead Cleaners

The In Bulkhead Cleaners are mechanical cleaning tools designed to clean connectors residing in an adapter or faceplate and unmated connectors. The tools use a novel dry cleaning strand to gently sweep and lift away dust and residues from the connector end face.

The MT series mechanical cleaning tools are designed for cleaning the fiber arrays on MT based connector systems. These tools are capable of cleaning MT based connector systems loaded in a bulkhead adapter, on the card edge, the backplane and on unmated cable assemblies. The cleaners will clean both female (no guide pin) and male (with steel guide pins). These tools will clean both flat polished multimode and 8° angled singlemode MT ferrules.

Applications

- Telecom Central Offices
- Data Centers
- Cable Television Head End
- Outside Plant and Fiber To The Home
- Fiber to The Antenna for WiMax and Cellular Networks
- Fiber Optic Broadcasting including HDTV
- Fiber Optic Military and Civilian Aviation
