

MULTIPURPOSE DOUBLE CASSETTE (MPDC)

Multiple use cassette with several mounting options

Fiber Connections' MPDC or "Multipurpose Double Cassette" is similar to the original MPC but with room for two LGX panels instead of one. This double panel LGX Cassette is an excellent choice for either pre-terminated cable interconnection or cable splicing applications, both which can be easily routed inside.

The small footprint of the cassette along with several different mounting options makes it adaptable for many scenarios. The LGX adapter panel can hold up to 24 fibers (LC), and there are two cable entry locations for added flexibility. On the back of the cassette there is a cutout for MTP adapters should the application require a pre-terminated solution.

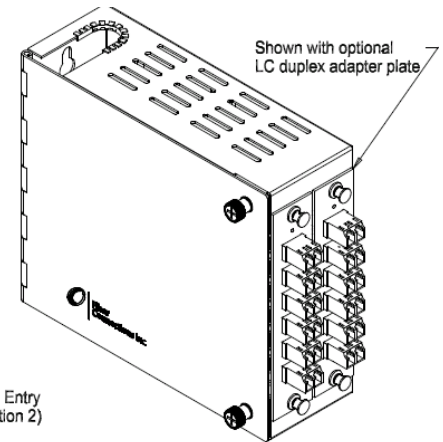

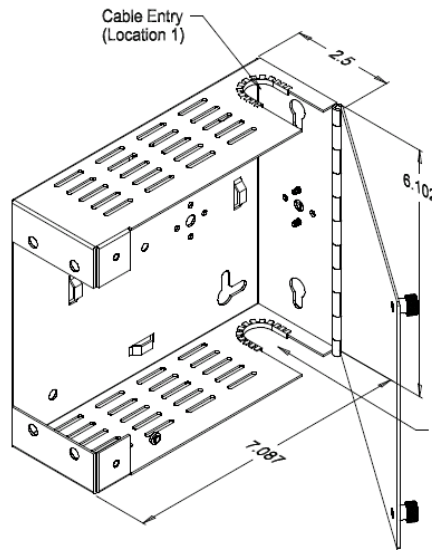

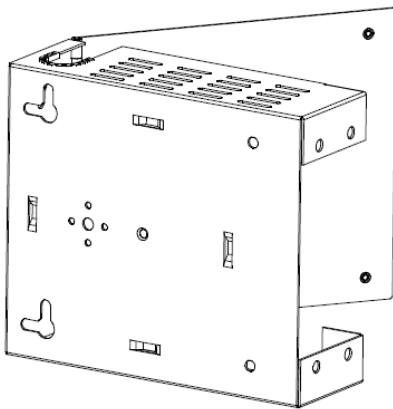

KEY FEATURES

- Two cable entry locations
- Custom configurations available upon request
- DIN rail mounted or wall mount option
- Standard LGX adapter panel at front. Option for a blank plate for splice only applications
- Provides room for up to 24 splices

ACCESSORIES INCLUDED

- DIN rail clip
- Cable ties
- Cable entry gland
- Cable management clips
- Identification label
- Splice chips

PN Variable	Code
Adapter Plate	XX
LC Duplex x6	LD
SC Duplex x6	SD
ST Simplex x12	ST
SC Simplex x6	SC
ST Simplex x6	SS
None (No Plate)	NA
None (Blank Plate)	BL
Fiber Type/Adapter Colour (Y)*	Y
Aqua (OM3/OM4)	A
Beige (OM1)	1
Blue (OS2)	2
Green (OS2/APC)	3
Not Applicable	N
Pigtail Option (Z)	Z
With 900um pigtail kit	Y
No pigtails	N

Kit Included Accessories:
 1 x DIN clip and screws
 1 x Cable entry gland (4.8mm to 11.4mm)
 1 x 12 position double high splice chip (24 positions total)
 24 x Fusion splice sleeves (60mm long, clear, 2.5mm)
 4 x Tie wraps
 4 x Cable management clips
 1 x Laser radiation label
 1 x Port ID label
